PEAK LIFTING PERFORMANCE

Peak Lifting Performance

ENGINEERING & ASSURANCE

RENEWABLE ENERGY · ONSHORE & OFFSHORE WIND · UK, EU & APAC

Best-in-class engineered lifting for the energy transition

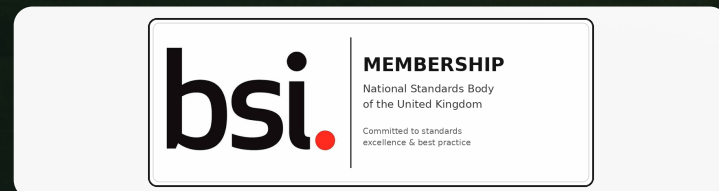

Summit Heavy Lift Consultants Ltd is a leading engineering and assurance consultancy specialising in the renewable energy sector. We challenge industry practice to raise the standard for zero harm — delivering precision, safety and efficiency at every stage of wind farm construction, installation and operations.

WHAT WE DELIVER FOR CLIENTS

- **Engineered Lift Design**
Tailored lift engineering for jackets, monopiles, TPs, WTGs and cables.
- **Lifting Assurance**
Independent third-party reviews, gap analysis and technical authority.
- **Installation / Major Component Exchanges**
Installation / or O&M lifting expertise providing safe, efficient lifting operations across on/offshore wind farms.
- **Audits & Compliance**
Operational audits against ACoPs, LOLER and UK/EU legislation.
- **On/Offshore Lift Planning**
Engineered lift planning for onshore sites and offshore wind campaigns.
- **SME & Consultancy**
Subject-matter expertise and consultancy across lifting campaigns.

Numerous wind farms supported over many years in the UK, EU and APAC
