

Engineered lifting. Assured operations.

Renewable energy specialists in engineered lifting and consultancy — with technical authority across heavy industry.

WHAT WE DELIVER FOR CLIENTS

- **Lift Planning & Engineered Lifts**
Tailored lift plans for onshore and offshore campaigns — mobile, crawler and vessel cranes.
- **Lifting Assurance & Audits**
Third-party reviews, gap analysis and operational audits that keep sites compliant and people safe.
- **Technical Authority**
SME support in cranes, rigging and lifting practice across every stage of a project.
- **Legislation & ACoP Compliance**
UK and European LOLER, PUWER and approved codes of practice — adapted to local rules worldwide.
- **Transportation & Coordination**
Management of load movement, rigging design and site coordination from concept to execution.

SECTORS WE SUPPORT

Renewable Energy first

Best-in-class lifting for offshore wind — foundations, monopiles, TPs, cables, WTG installation and major component exchange. The same engineering discipline across:

- On / Offshore Wind · Biomass
- Petro-Chemical · COMAH Sites
- Nuclear New Build · Shipbuilding
- Rail · Construction
- Ministry of Defence

Numerous wind farms previously supported over many years in the UK, EU and APAC regions.
